

Programma del Modulo "Networks"

- Codice: DT0341
- Tipo di corso: Obbligatorio (Laurea Magistrale in Data Science Applicata percorso Data for Smart City), Obbligatorio (Laurea Magistrale in Data Science Applicata percorso Data for Life Science)
- Livello del corso: Lauree Magistrali
- Semestre: 2

Numero di crediti ECTS: (Laurea Magistrale in Data Science Applicata) 6 (carico 150 ore)

Docenti: Giovanni Stilo (giovanni.stilo@univaq.it)

1	Obiettivi del corso	The student will be able to manage and analyze networks from several aspects.
2	Contenuti del corso e risultati formativi (descrittori di Dublino)	<p>Gli argomenti trattati nel corso comprendono:</p> <ul style="list-style-type: none"> • Fundamentals of graph theory and Notation • Linear Algebra and Norms • Node Similarity Measures and algorithms • Network Generators • Key Players of a Network and Centralities measures • Networks and communities: algorithms and metrics. <p>Alla fine del corso, lo studente dovrebbe:</p> <ul style="list-style-type: none"> • On successful completion of this course, the student should: Understand: • Where graphs are, why they are important, and what are new applications; • The main challenges from data mining perspective: <p>Learn: • Analyze networks to understand the properties and the behaviors of individuals • Think in a research perspective (novelty,clarity,...) • Solve practical problems</p>
3	Prerequisiti	- Knowing at least one Programming Language. - Notions of linear algebra.
4	Modalita' e lingua di insegnamento	<p>Lingua: Inglese</p> <p>Testi/Bibliografia</p> <ul style="list-style-type: none"> • Chakrabarti, D. and Faloutsos, C., <i>Graph mining: laws, tools, and case studies..</i> 2012. • Aggarwal, C.C. and Wang, H. eds, <i>Managing and mining graph data.</i> Springer. 2010. • Easley, D. and Kleinberg, J., <i>Networks, crowds, and markets: Reasoning about a highly connected world.</i> Cambridge University Press. 2010.
5	Metodi di accertamento	Project, oral presentation of the project and discussion of course topics.
